---

PROFESSIONAL PROFILE

Software Developer with 3+ years of experience building responsive web and mobile applications using React, Next.js, and React Native. Skilled in API integrations, scalable architectures, and Agile collaboration. Recognized for delivering **secure, user-friendly solutions** that improve customer experiences and reduce support requests. Passionate about **front-end excellence** and eager to contribute to innovative development teams.

Looking for an opportunity to contribute as a Software Developer, helping create applications that improve everyday experiences for users while growing my technical and professional skills.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, Java, C#, Python, SQL
- **Front-End:** React, Next.js, React Native, Expo, HTML5, CSS3, SCSS, Bootstrap, Tailwind
- **Back-End & APIs:** Node.js, REST APIs, OOP, Firebase
- **Cloud & Tools:** AWS (EC2, S3, Lambda), Heroku, Git, Postman, WordPress
- **Core Competencies:** Cross-Functional Collaboration, Clear Communication, Adaptability, Time Management, Customer-Focused Development

PROFESSIONAL EXPERIENCE

Web Developer – Merit Group of Companies | Vaughan, ON | May–Dec 2023

- Increased organic traffic 30% by implementing SEO, accessibility upgrades, and responsive redesigns.
- Delivered front-end fixes and enhancements in WordPress, HTML, CSS, and JavaScript, ensuring cross-browser compatibility.
- Collaborated directly with stakeholders, translating requirements into scalable web solutions.
- Environment: *WordPress, HTML, CSS, JavaScript*

Software Developer – Telemed MD | Mississauga, ON | Sep 2022–Apr 2023 (Contract)

- Reduced support tickets 25% by building new portal features with React, TypeScript, Node.js, REST APIs, and SQL.
- Improved system reliability by resolving Heroku integration issues, providing technical support under tight timelines.
- Actively contributed to Agile sprints, unit testing, and code reviews, strengthening product quality.
- Environment: *React, TypeScript, Node.js, SQL, REST APIs, Heroku, Agile/Scrum*

Software Developer – MD Connected | Toronto, ON | Oct 2021–Aug 2022

- Developed secure messaging apps used by 10,000+ patients using React, React Native, Expo, Firebase, and AWS.
- Partnered with UI/UX teams (Figma, Agile) to deliver intuitive user interfaces, reducing user support requests.
- Contributed to back-end development in Java and C#, applying OOP principles to expand full-stack skills.
- Environment: *React, React Native, Expo, Firebase, AWS S3, Java, C#, OOP, Agile*

ADDITIONAL EXPERIENCE

Data Annotator – DataForce | (Remote) | Jul 2025 – Present (Freelance)

- Process and tag high-volume datasets to support AI/ML training, applying detailed guidelines to ensure consistency and reliability
- Perform research and judgment on ambiguous entries, escalating when needed to maintain data quality standards

Data Annotator – TransPerfect | Vancouver, BC (Remote) | Mar–Dec 2024 (Contract)

- Labeled and validated 50,000+ datasets using proprietary annotation platforms, ensuring 90%+ accuracy through attention to detail and accountability
- Resolved ambiguous cases with online research and QA collaboration, applying problem-solving and communication skills to maintain project standards

PROJECTS

Portfolio Website
Developed a responsive personal website with animated components to showcase professional experience, skills, and projects. Provides a polished, user-friendly platform for recruiters and employers to access work samples, live demos, and contact details.
Environment: React, Next.js, TypeScript, Tailwind CSS, Framer Motion, Vercel
Live Demo | Source Code

Memory Game
Built an interactive card-matching game using modular components and state management. Designed to enhance engagement through a simple yet challenging gameplay experience while demonstrating component reusability, responsive design, and front-end logic.
Environment: React, Node.js, Vite, JavaScript, SCSS, Nekosia API
Live Demo | Source Code

Storm Chaser App
Created a mobile app that provides real-time weather data and location-based storm tracking. Offers users an interactive interface to monitor conditions, stay informed about severe weather events, and improve personal safety.
Environment: React Native, Node.js, Expo, JavaScript, TypeScript, Open-Meteo API
Source Code

EDUCATION & CERTIFICATIONS

ADaPT (Advanced Digital and Professional Training) Certificate – Toronto Metropolitan University | 2024

Advanced Diploma, Software Engineering Technology – Centennial College | 2021

CompTIA A+ (In Progress)
